

HOW TO USE A UV PEN MARKER

- 1 Mark valuable possessions such as phones, laptops, bikes, tools, or jewellery boxes. Avoid delicate surfaces where ink may damage the finish.
- 2 Use your postcode and house number- this helps police identify the rightful owner if stolen property is recovered.
- 3 Write in discreet areas (inside battery covers, under drawers, on the underside of furniture). Keep marks small but legible under UV light.
- 4 Shine a UV torch or lamp to check your mark is visible. Reapply if the writing fades over time.
